

## LEVEL 3 3-4 YEARS

Building the foundation for learning.

Level III is where curiosity transforms into meaningful learning experiences. Children are introduced to early academic concepts while continuing to develop confidence, collaboration, and problem-solving skills.

**At this stage, children:**

- Begin recognizing letters and numbers
- Engage in early pre-reading and pre-writing activities
- Develop critical thinking through guided exploration
- Strengthen social skills through group interaction

Learning is dynamic, engaging, and intentionally designed to keep children motivated and excited.
